

Ramamohan S

Lead DevOps Consultant

☎ +91-9108642689 | ✉ ramsirigi3@gmail.com | 📍 Bengaluru, India

Objective

Results-driven DevOps leader with 9+ years of experience in architecting and optimizing CI/CD pipelines and cloud-native infrastructure across multi-cloud environments (GCP, AZURE & AWS). Proven expertise in Kubernetes cluster administration, Infrastructure as Code (Terraform), and containerized deployments, enabling faster release cycles and enhanced platform reliability. Adept at delivering automated, scalable solutions aligned with business objectives while fostering innovation through modern DevOps practices. Passionate about advancing Kubernetes mastery and leveraging AI-driven development tools to transform workflows.

Technical Skills

GCP, Azure, AWS, DevOps, Kubernetes, Terraform, Ansible, CICD(Azure DevOps, Jenkins, GitHub Actions, ArgoCD), Migration, Site Reliability Engineer, Git, GitHub, Azure Repos, Bash, Python, Datadog, Prometheus, Grafana, ELK, BigPanda, PagerDuty, Hashicorp Vault, Fortify, Jira, ServiceNow

Experience

Lead DevOps Engineer, UST Global - Bangalore,
Client: Equifax

July 2022 – Present

Responsibilities:

- Leveraged 9+ years of experience to architect and deploy scalable **GCP** and **Azure** solutions, optimizing operational efficiency and multi-cloud performance.
- Certified **GCP Professional Cloud Architect**, **Azure Solutions Architect**, and **DevOps Engineer Expert** with advanced proficiency in **Terraform-driven** automation and DevOps best practices.
- Architected high-availability hybrid microservices on **GKE** and **Cloud Run** using Istio service mesh for zero-trust mTLS security, traffic routing and dynamic autoscaling via **Managed Instance Groups(MIG)**.
- Built secure event-driven architectures with **Pub/Sub**, **Cloud SQL** and **GCS**, enforcing custom VPC firewall rules, private service access and automated data lifecycle management.
- Engineered secure data infrastructure by managing access to **BigQuery datasets** using fine-grained **IAM role bindings** and conditional policies to enforce least-privilege governance.
- Automated continuous security compliance across GCP workloads by integrating **Google Secret Manager** with automated Service account key rotation and secret lifecycle management.
- Implemented GitOps deployment patterns leveraging **Argo CD**, **GitHub Actions** to ensure declarative, version-controlled delivery.
- Implemented cross-region Disaster Recover (DR) and automated backup strategies using **GCP Backup and DR service** across Cloud SQL, BigQuery and Cloud Storage.
- Designed and deployed highly resilient **Network load balancer (NLB)** on GCP to front Looker application instances ensuring low latency TCP traffic distribution, seamless SSL termination and continuous health check for high availability.
- Authored and customized **Helm charts** with advanced values management, secrets handling, configuration templating, and upgrade lifecycle strategies.
- Supported cloud cost management, optimization, and resource governance initiatives improving efficiency and security posture.
- Applied rollback strategies, release automation, and deployment governance to ensure reliable environment promotions and production stability.
- Partnered with application, DevOps, security, and infrastructure teams to define cloud standards, deployment patterns, and operational runbooks.
- Engineered an enterprise **SRE observability** strategy by integrating **Datadog** across GCP workloads to monitor

metrics, alerting and SLIs/SLOs, reducing MTTR through proactive, automated alerting based on error budgets.

Senior Associate Consultant, Infosys Limited - Hyderabad,

March 2019 – July 2022

Responsibilities:

- Led AWS cloud infrastructure management for large-scale systems, optimizing high availability, scalability, and cost efficiency.
- Designed and deployed Infrastructure as Code (IaC) using Terraform and Ansible to automate and streamline configuration management.
- Architected robust CI/CD pipelines utilizing Jenkins to accelerate release management and improve deployment frequency.
- Managed containerized applications and orchestration platforms using Kubernetes to ensure seamless application delivery.
- Implemented comprehensive observability frameworks leveraging Prometheus, Grafana, and ELK Stack for real-time monitoring and alerting.
- Strengthened infrastructure security by enforcing AWS network and application security best practices across all environments.
- Mentored and guided junior engineers, driving team deliverables, fostering technical growth, and promoting DevOps best practices.

Senior Project Engineer, Wipro Limited - Bangalore,

Nov 2017 – Feb 2019

Responsibilities:

- Automated Azure infrastructure provisioning using Terraform, deploying AKS, VNets, NSGs, Load Balancers, and storage services across all environments.
- Built Azure DevOps CI/CD pipelines integrating Terraform and Helm, reducing manual effort by 80% and ensuring consistent AKS deployments.
- Designed and implemented scalable CI pipelines using GitHub Actions to automate source code compilation and artifact generation with Maven and Gradle.
- Configured Azure networking (VNet peering, private endpoints, App Gateway) to enable secure, high-performance microservices communication.
- Hardened AKS clusters with network policies, Azure RBAC, private endpoints, and Key Vault-based secret management.

Software Engineer, Intelli swift Software India Private Limited - Bangalore,

May 2017 – Aug 2017

Responsibilities:

- Implemented and administered CI/CD processes using Jenkins for automated build and deployment workflows.
- Managed Red Hat servers, including installation, configuration, backup, and recovery activities.
- Performed package installation/upgrade, patching, configuration management, version control, and security troubleshooting.
- Handled core Linux administration tasks such as user management, volume configuration, filesystem setup, service configuration, firewall management, and system monitoring.

Certifications

- 🏆 Certified Google Cloud Professional Architect
- 🏆 Certified Claude Architect-Foundations
- 🏆 Certified Azure Solution Architect
- 🏆 Certified Azure DevOps Engineer Expert
- 🏆 Certified Microsoft GitHub Copilot
- 🏆 Certified Terraform Associate
- 🏆 Certified Azure Administrator

🏆 Certified Azure Security Engineer

🏆 Certified Azure AI Fundamentals

Education

BTECH, Electrical And Electronics Engineering

2010 – 2014

- JNTU Ananthapur.
